

Digital Learning Initiative

Sunnyvale Community School Corporation

WE ARE 1:1 with 750 students grades 6-12.

OUR DEVICE is primarily iPad, with MacBooks in grades 11 & 12

OUR LMS is My Big Campus

OUR NETWORK is a 10GB Fiber Optic WAN, with 200MB egress. Each one of our buildings is fully wireless and provides an access point in every classroom.

DIGITAL LEARNING GRANT: 2014

OUR VISION for digital learning is that technology can engage students through personalization and collaboration. It can also connect students to a variety of resources and enable them to present to authentic audiences without having to leave the classroom. Our Digital Learning Initiative also supports a blended approach that empowers student learning beyond the classroom and school day.

OUR COACHES support teachers in planning and delivering a new kind of instruction. Our two technology specialists divide time amongst our three 1:1 buildings. They provide training, modeling, and just-in-time support for 60 teachers in grades 6-12.

OUR PROFESSIONAL DEVELOPMENT is focused on transitioning our professional practice toward a student-centered, self-directed form of instruction that leverages digital tools for collaboration and research. Teachers are engaged in curating standards-aligned digital resources inside our learning management system. These new lessons follow an inquiry-based approach.

OUR GRANT provided an additional 120 iPad Air tablets, allowing us to expand our existing 1:1 into our 6th grade classrooms. These funds also allowed us to provide training to our teachers which introduced research-based strategies to improve curriculum and instruction. Paid release time also allowed teachers to engage with our standards, creating and curating digital lessons in each content area.

For more information about digital learning in our district, email: support@sunnyvale.k12.in.us or visit our website: <http://www.sunnyvale.k12.in.us>
